Mr. Femi Akindele Residual Project Manager Kentucky/Tennessee Section U.S. Environmental Protection Agency Region IV 61 Forsyth Street Atlanta, GA 30303

Re: Report of Field Observation – FY01 - First Quarter (FY01-1Q) Lees Lane Superfund Site, Jefferson County, Kentucky, Administrative Order on Consent, USEPA Docket No-91-32-C

Dear Mr. Akindele

In accordance with paragraph 11, under Reporting Requirements, of the subject Consent Order and Attachment 1, Operation and Maintenance Plan For Post-Removal Site Control at the Lees Lane Landfill Site. I am enclosing one (1) copy of the Report of Field Observation (Appendix J), identified as Observation Report No FY01-1Q, for your information and files.

Please advise if you have any questions concerning the attached Report of Field Observation

Sincere

Special Assistant to Director of Maintenance

RHW/rw/ Lees-01-1Q

## REPORT OF FIELD OBSERVATION LEE'S LANE LANDFILL SITE, LOUISVILLE, KENTUCKY

Observation Report No.: FY01-1stQ Date of Observation: 09/29/00

Instruction: If any item is checked yes, provide details of the problem and maintenance

recommendations below and indicate the location of deficiency on the site map

provided.

#### Comment No .:

#### Comment

A-4 Observed small rutting on the gravel road leading to gas collection Well No. 5. Small depressed area of access road between benchmark 3 and 4 near the northern portion of the site.

B-2 Observed Putnam Avenue barricade has been painted and remains unchanged from previous quarterly institutional inspections. Landfill site and flood protection levee areas intrusion by ATV's from wooded areas adjacent to the Putnam Avenue barricade has decreased, however, is still noticeable. The landfill site and flood protection levee continues to receive surveillance by the Jefferson County Police. Vegetation along the access

road to the Putnam Avenue barricade has been cut back.

C-1 Observed no evidence of small arms fire damage to the Blower House from previous quarterly institutional inspection.

#### Comment No.

### Corrective Action Performed

A-4 Grading of gravel on the access road leading to Well No. 5 to fill rutted areas by the end FY01-2Q. Consider placement of earthen backfill in depressed area of access road; provide surface layer of 610 stone and dense grade aggregate for a driving surface.

B-2 Continue to observe condition of the Putnam Avenue barricade during future quarterly institutional inspections. Installation of "No Trespass – Keep Out" signs at strategic locations along the access roads and Mill Creek cut-off channel areas in continued effort to discourage ATV intrusions and trespass into the landfill and levee area sites.

C-1 No corrective action required at this time.

Comment No.:	Comment
C-7	Observed moisture trap No. 19, concrete collar has settled and need to be reset.
C-8	Observed covers missing for moisture traps 25, 26, and 27.
D-2	Observed two guardrails had been damaged at Gas Monitoring Well No. G-3.
D-4	Observed that the concrete pad for Gas Monitoring Well No. G-2 has been replaced from previous institutional inspections.
E-7	Observed limited vegetative growth in the riprap areas adjacent to the clay cap and riprap drainage channels.
1	Observed small amount of trash and debris build-up on the riprap area from prior observations. Trespassers continue to utilize the debris as fuel for small bonfires, thereby eliminating the necessity to remove the debris from the riprap area.
F-5	Observed small amount of standing water at the upstream inlet of culvert pipe crossing under the asphalt access road. Condition of shale drainage swale appears to be satisfactory, evidence of siltation at the outlet of culvert pipe.

Comment No.	Corrective Action Performed
C-7	Schedule resetting of disturbed concrete collar for moisture trap No.19 prior to FY01-2Q institutional inspection.
C-8	Obtain replacement covers and install on moisture traps prior to end of FY01-2Q.
D-2	Schedule repair, welding and painting of guardrails around Gas Monitoring Well No. G-3 prior to end of FY01-2Q.
D-4	No further action required at this time.
E-7	Schedule independent contractor to spray riprap area adjacent to the clay cap during FY01-3Q in order to control re-growth of vegetation.
E-8	No further action required at this time.
	Continue to monitor shale drainage swale at quarterly institutional inspections. Consider limited regrading of shale drainage swale to reduce siltation create positive drainage of culvert pipe crossing under asphalt access road.
